

# Bowers & Wilkins

## C5 Series 2 In-Ear Headphones

Thanks to improvements in small-scale drive unit design, the latest version of our C5 in-ear headphones sounds more natural and controlled than ever. C5 Series 2 comes from Bowers & Wilkins, an audio company with close to five decades of experience creating the loudspeakers that world-leading recording studios depend upon.

**Listen and you'll see.**

# C5 Series 2 In-Ear Headphones

## Acoustics

**Superb sound** C5 Series 2 use a new 9.2mm dynamic driver, and have been optimised to deliver bass that's powerful yet precisely controlled, resulting in a more natural, open and detailed sound.

**Micro Porous Filter** Bowers & Wilkins is dedicated to bringing you closer to the true sound of music. The C5 Series 2's unique Micro Porous Filter ensures the sound you hear is open, spacious and full of rich, lifelike detail, just like you hear with our reference Hi-Fi speakers.

## Features

**Secure Loop design** The C5 Series 2 features our innovative Secure Loop design – cushioned loops that curl around the ear's inner rim to hold them in place. The loops are infinitely adjustable, so you always get the perfect fit. Or they can be detached, if you would rather use the C5 Series 2 without.

**Usability and comfort** C5 Series 2 include an improved remote and microphone control that has been redesigned to improve usability. These headphones are 10% lighter than the previous version, which means they're an even more comfortable fit.

## In the box

C5 Series 2 In-Ear Headphones

## Meet the family

**P5 Series 2** These headphones deliver a truly revelatory sound experience, thanks to an all-new drive unit design inspired by our Hi-Fi speakers, and adapted from our flagship P7 headphones.

**P7** For these award-winning headphones we have drawn on everything we know about speaker technology and created a new standard for portable Hi-Fi sound quality.
